

Support quality health care:

Support HAMILTON HEALTH SCIENCES CORPORATION **Nurses**

We the registered nurses at Hamilton Health Sciences Corporation have grave concerns about the decline in relations with hospital management – and the resulting negative impact on our work environment where we strive to provide quality patient care each and every day.

We have continuing concerns that include:

- the lack of a safe workplace for nurses and our patients.
- a management team that continues to waste your tax dollars and time on disputing our concerns rather than working with us to resolve them together at an early stage.
- ongoing treatment of injured and disabled nurses that an arbitrator recently called “malicious” and the use of a consulting firm that the arbitrator found to be “unfit to perform” its tasks.
- a toxic work environment that interferes with our ability to focus on patient care.
- continuing denials of our negotiated rights under our collective agreement.

We know that we are vital members of the health-care team that you depend on.

That is why the 2,600 registered nurse members of the Ontario Nurses' Association have taken the very serious step of censuring this employer.

We hope that this censure prompts hospital management to work together with us to address our numerous outstanding concerns.

If you care about our ability to provide safe, quality patient care, please take a moment to express your support.

Send a letter to the editor, an e-mail or letter to the Local Health Integration Network, the hospital CEO or board – demand that nurses at Hamilton Health Sciences Corporation are treated with dignity and respect and can provide the patient care we so dearly want to give to this community.
